

Dover School District Mission Statement

Dover Elementary School is a community-centered learning environment that provides all of its students with a strong foundation for a lifelong interest in learning so that they may become responsible members of an every-changing society.

We believe that;

All students can learn.

Students learn in different ways and should be provided with a variety of instruction approaches and assessments to support their learning.

Students learn best when they are actively engaged in the learning process.

Self-esteem and learning are enhanced by a safe environment, positive relationships, and mutual respect among and between students and staff.

Parents, teachers, administrators and the community share the responsibility for advancing the schools' mission.

Celebrating differences among people will provide the opportunity for increased understanding and respect.
